IN MEMORY OF

NORMAN FRITZ

President of Cancer Control Society

who passed away from Circulatory Disease at age 81

Norman graduated in 1949 from the University of Kansas in Lawrence with a Bachelor of Science Degree in Aeronautical Engineering. Prior to that he was awarded a membership in Sigma Tau, which is an honorary engineering fraternity. After a career in Aerospace Engineering including designs for several vehicles, he left engineering in 1977 to work full time at establishing the Gerson Therapy.

His interest in physical health increased tremendously in 1964 when he met Mrs. Cecil Hoffman who was the Founder of International Association of Cancer Victims & Friends. Through this association, Mr. Fritz discovered “the second world” of numerous suppressed therapies which appeared to him scientifically more valid than most of the therapies used by orthodox medicine. He was on the original Board of the

International Association Of Cancer Victims & Friends (IACVF) in 1964, and for many years served as Vice-President, then as President. He was Editor and then writer for the Cancer News Journal. Norman was one of the pioneers in developing IACVF and the first to start a chapter.

In 1974 (15 years after Dr. Gerson’s death) he began a project to get the Gerson Therapy established to teach physicians and the public how to heal and prevent “incurable” diseases, to further develop the Gerson Therapy and to create Gerson Therapy Hospitals. He asked Dr. Gerson’s daughter, Charlotte, to join him in that project. In 1977 he helped to establish the first of the Gerson Hospitals in Mexico. In 1978 he initiated the Gerson Institute of which he was Vice-President until 1995.

In 1973 Norman was a Co-Founder and Vice-President and in 1987 became the President of the Cancer Control Society for almost 20 years. He was an inspiration to all and will be greatly missed.

To help carry on his work in the Society, please send memorial donations to the Cancer Control Society, 2043 N. Berendo St., Los Angeles, CA 90027.

Frank Cousineau
